Practice makes perfect.

And this is the perfect practice.

UNLIMITED PRACTICE, UNPARALLELED PREPARATION

If their experience on simulated NCLEX Practice Exams indicates they may not reach the passing benchmark, students can continue to quiz on the concepts or client needs areas with which they are struggling and demonstrate their mastery before attempting the comprehensive experience again.

Reports indicate where students are strong and weak, so they know what the next steps are. And they can take those next steps within Lippincott PassPoint.

Comprehensive exams in Lippincott PassPoint are adaptive by question, just like the exam. Students can see if they have performed above the passing threshold for each exam.

The ability to see performance across multiple exams is a significant value and benefit of Lippincott PassPoint. Students can see cumulative exam performance reports, as well as detailed reports about each exam. This gives them better insight as to how they may perform on the actual NCLEX than relying on a single isolated test—insight that is particularly crucial for at-risk students.

Practicing in an authentic environment is the perfect way to learn.

“[I] fell in love with prepU when it first came out and this addition [PassPoint] makes it even better.”

– Gerry Walker, DHEd, MSN, RN

Park University

Lippincott PassPoint integrates the power of prepU, adaptive practice exams, evidence-based content, and real-time performance data to create a proven approach to NCLEX preparation.

94.5% Pass Rate

The NCLEX-RN pass rate for students who use PassPoint is 94.5% (national average is 83.04%), according to An Investigation of Student Use of PassPoint and NCLEX-RN Outcomes by Julia C. Phelan, PhD.

Introducing Lippincott PassPoint

Lippincott PassPoint is the only online solution available that provides students with the opportunity to take practice quizzes in individual topics and to simulate the comprehensive NCLEX. Both experiences are adaptive—that is, they customize students’ pathways through the curriculum and provide a personalized, technology-enabled, and data-driven approach to learning.

Lippincott PassPoint integrates:

- **Practice quizzes that adapt to each student’s knowledge level**
  Each set of quiz questions becomes more difficult as the student masters each nursing topic, concept, or NCLEX Client Needs category. This adaptive functionality helps students focus their preparation, prioritize study time, and build test-taking confidence.

- **Practice exams that simulate the comprehensive NCLEX**
  Just like the NCLEX, Lippincott PassPoint’s comprehensive Practice Exams adapt question by question. Students who answer questions correctly receive increasingly difficult questions, while students who answer questions incorrectly continue to receive questions at the same or an easier level until they are successful. There is simply no better way for students to prepare for the computer adaptive testing they will encounter when they sit for licensure.

- **Superior content and remediation**
  This dynamic solution offers more NCLEX-style questions than any other system, with detailed rationales that assist students in reasoning and thinking critically. Answer keys for each question remediate to evidence-based, point-of-care content at the moment students don’t understand something. This exposure to real-world competencies and procedures engages students and enables them to make the best possible choices for both passing the NCLEX and providing safe and effective patient care.

- **Insight into learning**
  The reporting functionality provides actual performance data so you can quickly spot at-risk students or which concepts your class as a whole is struggling to understand. Students can have powerful insight into their own performance so they know where to focus their time most effectively, and can have a benchmark for their performance on the actual exam.

“No comparison. [PassPoint is the] best product I have used.”

Susan Snellgrove, PhD, APN, Arkansas State University

Lippincott PassPoint
CLINICAL COMPETENCE AND CONFIDENCE

Point-of-care, evidence-based content helps students prepare for practice

Prepare your students to make the transition from the classroom to practice.

One of our commitments is to help ensure that nurses graduate with the strong critical thinking skills and rapid decision-making abilities that health care providers seek in direct care nurses. Therefore, in addition to helping students pass the NCLEX, Lippincott PassPoint also prepares students to succeed in practice settings through exposure to real-world competencies and procedures.

Within Lippincott PassPoint, SmartSense links take students directly to content from both Lippincott Procedures, which includes step-by-step instructions for clinical skills competencies, and Lippincott Advisor, which provides specific clinical answers synthesized into entries on diseases and conditions, signs and symptoms, diagnostic tests, treatments, and hospital-acquired conditions.

By linking NCLEX-style questions and rationales directly to evidence-based clinical information found in Lippincott Procedures and Advisor products, Lippincott PassPoint helps students learn how to critically think through situations using evidence-based content that is already being used by thousands of practicing nurses nationwide. This connection engages the students, enabling them to make the best possible choices for both passing the NCLEX and providing safe and effective patient care.

SmartSense

Content connecting education to practice is available through SmartSense links embedded in Lippincott PassPoint, creating a built-in remediation plan that provides corrective information at the moment when a student does not understand a concept, technique, or procedure. Whenever a SmartSense link appears, a deeper connection that supports both comprehension and application is available for the student.
Assessment for learning, not for evaluation

*Lippincott PassPoint*, powered by prepU, provides you with ongoing and detailed student performance feedback, including individual and class strengths and weaknesses, misconceptions, usage patterns, and class performance as compared to a national student pool. Now you can identify and help at-risk students as well as provide them with the next steps to help improve their performance, all within the same product, and while there is still time to make these adjustments.

*Lippincott PassPoint* provides students with a complete assessment solution:

- **Formative Feedback**: Students receive ongoing information on their progress so they can remediate and make adjustments in real time.
- **Targeted Practice**: Practice quizzes adapt to each student’s knowledge level, becoming more difficult as the student masters each nursing topic or Client Needs category. These can be completed based on the formative feedback, ensuring practice that is focused and effective.
- **Focused Remediation**: Links to evidence-based content remediate weaknesses and prepare students for real-world practice.

Predictive information is not helpful if it comes too late and if the next steps are not clear. You need to know how to act on information in order to make it formative.

Lippincott PassPoint
Introducing Lippincott CoursePoint

When used throughout the nursing curriculum, Lippincott CoursePoint and Lippicott PassPoint provide a comprehensive assessment and remediation solution from day one through the NCLEX.

Lippincott CoursePoint helps nursing students understand, retain, and apply knowledge by adapting to how they learn, and engaging students in ways the printed page simply cannot. Lippincott CoursePoint seamlessly integrates digital content and course-specific tools such as adaptive learning creating a rich learning environment that drives course and curriculum success.

Learn more about our full suite of nursing education digital solutions that bridge education to practice:

- **Lippincott CoursePoint+** elevates the learning experience to prepare students for practice by integrating vSim for Nursing virtual simulations and the latest, evidence-based clinical reference and drug information from Lippincott Advisor for Education.

- **Lippincott CoursePoint for Nursing Concepts** combines the power of adaptive learning with seamlessly integrated content from digital textbooks, journal articles, the latest evidence-based clinical information, and interactive resources – all organized by concepts and supporting exemplars.

- **Lippincott DocuCare**: This innovative digital solution integrates over 200 patient scenarios with web-based academic EHR simulation software, allowing students to learn how to use an EHR in a safe, true-to-life setting, while enabling instructors to manage their progress.

Commitment to nursing education.

Our commitment begins with up-to-date, evidence-based content that aligns with accreditation standards and provides you with the flexibility you need to offer your students the right amount of information when and how they need it. Whether your curriculum follows a concept-based or more traditional approach, we offer solutions that address the compelling challenges that administrators and faculty are facing today, including:

- Ensuring practice competency
- Navigating a complex and ever-changing healthcare landscape
- Engaging today’s learners
- Managing increased demands
- Safeguarding your accreditation and promoting student success

PROVEN RESULTS

Visit thepoint.lww.com/efficacy for detailed research supporting positive course and NCLEX outcomes with our digital solutions.
Training services and personalized support

The Lippincott Customer Success Team includes training coaches, product trainers, and nursing education consultants to help you integrate our suite of digital nursing education solutions. Your personal training coach will be with you every step of the way, coordinating the pace of your instruction to ensure you are maximizing our solutions’ potential.

Getting Started
Our initial training classes and resources are designed to help you build a solid foundation for the successful use of our products. Training resources are available 24/7 in multiple formats:

- Product user guides with step-by-step instructions
- On-demand training videos
- Training webinars led by coaches

Course Integration Classes
Providing next-level training for faculty, our course integration classes are led by Nursing Education Consultants, who are super-users of our products.

- Webinars demonstrate course integration strategies and best practices
- Our entire suite of digital nursing education solutions are covered, including Lippincott CoursePoint and CoursePoint+, Lippincott PassPoint, Lippincott DocuCare, vSim for Nursing, and Lippincott CoursePoint for Nursing Concepts

Ongoing Educational and Professional Development Events
Monthly webinars focus on hot topics in nursing education, advanced teaching strategies, and best practices to help you transform your nursing program, engage students, and improve outcomes. Recent topics include:

- Building Student Competence and Confidence with Clinical Skills and Simulation
- Active Learning: How to Flip a Classroom
- Program Evaluation and Accreditation Using Digital Resources

Student Training Resources
On-demand student training resources include product user guides, training videos, and NCLEX questions of the day.

Major changes in the U.S. healthcare system require equally profound changes in the education of nurses.

A Trusted Educational Partner

For more than 200 years, Wolters Kluwer has worked hand-in-hand with nursing educators to meet the needs of an evolving healthcare system. Today, educators face huge generational shifts in learning styles and modalities as well as a healthcare environment that has never been more complex.

Our philosophy is simple: Learning Never Ends. Everything we offer—authoritative content, innovative digital solutions, hands-on services—is designed to help students, educators, and practitioners in the nursing profession bridge the gap between the classroom and clinical practice to ensure lifelong professional competency.
